

## horse care product information

# Mollimentum®

## HOOF DRESSING

### DESCRIPTION:

Tuttle's MOLLIMENTUM® is a blend of natural ingredients that condition and protect the hoof from adverse environmental conditions. MOLLIMENTUM acts as an emollient while creating a "breathable barrier" to moisture loss that allows air and water transfer and helps keep the hoof strong and sound.

### PACKAGING:

Tuttle's MOLLIMENTUM is available in a 30 ounce quart can and a 7.5 pound gallon pail.

### PRODUCT ADVANTAGES:

1. Helps hooves hold moisture.
2. Helps keep hooves tough and pliable to resist concussion.
3. Aids in the prevention of hard, dry, brittle hooves.
4. Uses only high quality, natural ingredients to soothe and encourage healthy hoof growth.
5. Contains rosin, which acts like the natural protective coating of the hoof and helps retain moisture.
6. Made from a stable mixture of natural ingredients that will not separate over a long period of time.
7. Contains no rendered animal by-products that require preservatives to prevent rancidity.
8. Contains no petroleum greases that can seal the hoof and block the transfer of air and moisture.

120 ounce (7.5 lb.)  
gallon pail

30 ounce quart can

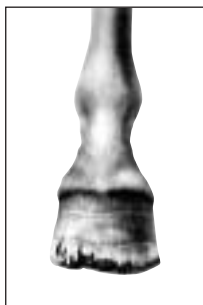

### ACTIVE INGREDIENTS:

Cottonseed Oil, 34.7%, combined with Rosin, Beeswax, Paraffin, and Turpentine for plasticity.

# Tuttle's Mollimentum® product information

MOLLIMENTUM® HOOF DRESSING applied regularly helps with total hoof maintenance. HARD, CRACKED, BRITTLE HOOVES AND HEELS usually occur because of excessive dryness. Freshly trimmed hooves are especially vulnerable to moisture loss through the raw hoof edges. MOLLIMENTUM applications help hooves retain vital moisture to keep them pliable.

CONTRACTED HEELS, HARD SOLE AND FROG, AND DRY CORONET, due to loss of moisture and body oils, are conditions that may be relieved after regular applications of MOLLIMENTUM. MOLLIMENTUM, massaged into these areas, provides emollient action and helps maintain the flexibility needed for the hoof to provide the proper "shock absorbing" function.

Dry, brittle hoof from lack of moisture.

Quarter cracks and cracked heels come from hoofs too dry and hard to absorb shock.

## DIRECTIONS FOR USE:

MOLLIMENTUM HOOF DRESSING is easy to apply, using either a small paint brush or a soft cloth.

Before applying MOLLIMENTUM, pick foreign matter out of soles and clefts of the frog. The foot and hoof wall should be clean and dry. Apply MOLLIMENTUM daily or as needed to all portions of the hoof, especially freshly trimmed hoof edges, and massage it into the coronet, or coronary band (at the hairline, just above the hoof), around the frog,

sole and over the bulbs of the heels. Work it in thoroughly.

To give the hooves a fine, glossy and finished appearance, apply MOLLIMENTUM HOOF DRESSING to the hoof walls and rub it in well with a soft cloth.

## CAUTION:

Keep out of reach of children. For external use only. Do not apply to irritated skin. If excessive irritation develops, discontinue treatment. Avoid getting into eyes or on mucous membranes.

## GENERAL INFORMATION:

MOLLIMENTUM HOOF DRESSING has been used by horse trainers and farriers since 1880 to maintain pliable hooves and help prevent hoof dryness. Excessive loss of moisture and body oils can cause hard, dry, brittle hoof walls and harden the coronet, sole and frog portions of the hoof. Without these vital fluids, pliability is lost and the hoof fails to provide the proper "shock-absorbing" protection to the leg from heavy impact. Regular applications of MOLLIMENTUM, together with adequate nutrition, helps ensure the pliability and toughness of all equine hooves. MOLLIMENTUM HOOF DRESSING forms a thin, flexible, moisture-resistant coating on the hoof wall which helps protect it from dry soil and air. MOLLIMENTUM acts as an emollient to soften and help the sole, frog and coronet hold the fluids they need to produce a tough, pliable foot that absorbs impact and softens shock. A tough, pliable foot is less prone to crack and split.

Applied to the hoof wall, MOLLIMENTUM adheres and fills tiny

surface cracks to retard moisture loss. It protects hooves which have lost their natural coating (the periople) by abrasion. MOLLIMENTUM gives hooves a shiny, natural appearance.

When the facts are known, it is obvious why Tuttle's Mollimentum is the knowledgeable horseman's hoof dressing of choice. Tuttle's products, chosen because they work.
