LIQUID 747®

A Complete Vitamin and Mineral Supplement for All Horses

Effectiveness:

TUTTLE'S LIQUID 747 is a unique horse feed supplement that provides high levels of Vitamins A, D-3, E, B-vitamins, selenium, potassium, iron, other trace minerals and amino acids for optimum development, stamina and appearance. Its highly palatable, apple-flavored base of cane molasses and corn oil is packed with calories for energy and appetite enhancement to assist with weight building and conditioning.

Labeled for use on:

Horses

Foals

Including:
stallions, brood mares, large draft horses and miniature horses

Directions for use:

Shake well before use. Mix into daily ration as a top dressing:

- For general horse care, 1 fl oz (2 tablespoons).
- For horses in heavy training, stallions, brood mares and large draft horses, 2 fl oz (4 tablespoons).
- For foals and miniature horses, .5 fl oz (1 tablespoon).

Available size:
1 gallon-jug

Key Facts:

- Formulated for performance.
- A complete vitamin and mineral supplement for all horses.
- Highly palatable apple flavored molasses base.
- More Vitamin E, Biotin, Inositol, Niacin, Potassium, Magnesium, Calcium, Phosphorus and Sodium than other leading brands.
- See results in four weeks.
- Provides the extra calories horses need for top performance.

LIQUID 747

A Complete Vitamin and Mineral Supplement for All Horses

GENERAL INFORMATION:

The right proportion of nutrients is important when feeding horses. The use of dietary vitamins, trace minerals and other body building ingredients from a variety of sources can help ensure that borderline deficiencies do not occur in rations when nutritional requirements are most critical.

LIQUID 747 provides nutrients needed for the formation of hemoglobin and other blood constituents in a palatable blend of natural products having excellent digestibility with concentrated vitamins and minerals. LIQUID 747 can help replace electrolytes such as potassium, sodium and magnesium that are lost with body fluids from hard-working horses. LIQUID 747 includes high levels of whey protein and brewer's dried yeast, which provide an excellent balance of the protein-building amino acids in this supplement. It also includes refined corn oil, a source of essential fatty acids needed for good-looking skin and hair.

LIQUID 747 contains NO beef product ingredients.

SUPPLEMENTARY INSTRUCTIONS:

The metered hand pump, available separately, will deliver 1 fluid ounce of LIQUID 747 each time it is fully depressed. Depending on daily dosage, 10 pounds of LIQUID 747 will last two to four months for most horses.

IMPORTANT: Intake of supplemental selenium should not exceed 0.3 ppm of a complete daily ration. Each fluid ounce of LIQUID 747 weighs approximately 39 grams. Two fluid ounces of LIQUID 747 provides a maximum of 1.9 mg of selenium, or 0.19 ppm, in a total daily ration of 22 lbs. (10kg).

CAUTION: Follow label directions. Excessive amounts of selenium may be toxic. The addition to feed of higher levels of this supplement containing selenium is not permitted. Store in a cool area inaccessible to children and animals. DO NOT store in direct sunlight. Not for human use.
