PYthon® II Dust
Livestock Insecticide

Chemical Class: | ZETA-CYPERMETHRIN | GROUP 3A | INSECTICIDE |

ACTIVE INGREDIENTS:	
Zeta-cypermethrin, S-enantiomer	0.038%
Piperonyl Butoxide	0.150%
OTHER INGREDIENTS	99.812%
TOTAL	100.00%

Effectiveness:

Controls	Aids to Control
Horn Flies	Face Flies
Lice	Stable Flies
Ticks	Other Nuisance Flies
Keds	

Labeled for use on:

Beef | Dairy + Lactating | Sheep | Horses | Goats

Available sizes:

2 lb. Shaker Can

12.5 lb. Refill Bag

50 lb. Bucket (4 Refill Bags)

Starter Kit - Includes A-Line Dust Bag with 12.5 lb. Refill Bag

Key facts:

- Formulated with an exclusive flow control agent for a consistent supply of insecticide that will not harden in a dust bag if it gets wet.
- Can be applied with Y-TEX A-Line dust bag or handy 2 lb. shaker canister.
- The shaker canister is ideal for treatment of:
  - Goats and sheep
  - Dairy calves in hutches
  - Horses
- The A-Line Dust bag is ideal for:
  - Remote pasture treatment
  - Alleyways where forced use promotes treatment

PYthon II Dust is the only dust that contains both Zeta-cypermethrin and Piperonyl butoxide. Zeta-cypermethrin is a next generation pyrethroid that is highly active against horn flies, face flies, ticks and other pests. Piperonyl butoxide helps overcome metabolic resistance in insects and synergizes the Zeta-cypermethrin for maximum efficacy and residual activity. PYthon II Dust is formulated for long-lasting activity in sunlight.

PYthon® II Dust
Livestock Insecticide

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Resistance-management Recommendations.
For resistance management, PYthon II Livestock Insecticide Dust contains a Group 3A/Zeta-cypermethrin insecticide. Any insect population may contain individuals naturally resistant to PYthon II Livestock Insecticide Dust and other Group 3A insecticides. The resistant individuals may dominate the insect population if this group of insecticides are used repeatedly in the same herds. Appropriate resistance management strategies should be followed. Monitor after application for unexpected target pest survival. If the level of survival suggests the presence of resistance, consult with your local university specialist or certified pest control advisor.

For Outdoor Use Only

For Beef and Dairy Cattle, Sheep, Goats and Horses: Can be applied by dust bag, shaker can, dusting glove and mechanical dust applicator. Do not use concurrently with insecticide ear tags containing zeta-cypermethrin or cypermethrin. Do not apply with power duster equipment. Do not enter or allow others to enter until dusts have settled.
Self-Treating Dust Bag Forced-Use - Horn flies, lice and face flies: Place dust bag in a daily forced use situation. Do not allow free choice use of dust bag. Place contents of package in any commercially available dust bag; suspend bag in gateways or lanes through which the animals must pass daily for water, feed, or minerals. For dairy cows, bags may be suspended in the exit through which the cows leave the milking barn. The bags should hang four (4) to six (6) inches below the backline of the cattle. For reduction of face flies, bags must be located so animals will be forced to use them daily and hung at a height so that the face is dusted.
Horn flies, lice, face flies, stable flies, ticks and keds (direct application): Apply up to 2 oz. (4 tablespoons) of dust per animal evenly into the hair over the head, ears, neck, shoulders, back, and tailhead. For spinose ear ticks, apply approximately 1/3 ounce (2/3 tablespoon) inside each ear. For stable flies, apply also to legs. For all applications, repeat as necessary but not more often than once in 3 days.

Do not make applications during rain. Avoid making applications when rainfall is expected before the product has sufficient time to dry (minimum 4 hours).

Rainfall within 24 hours after application may cause unintended runoff of pesticide application.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.
Pesticide Storage: Store in cool, dry place.
Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
Container Disposal: Non-refillable container. Do not reuse or refill this container. ***If empty:*** Place in trash or offer for recycling if available. ***If partly filled:*** Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

Y-TEX®

Y-TEX Corporation: 1825 Big Horn Avenue, Cody, Wyoming 82414

FIRST AID

This product contains zetacypermethrin, a pyrethroid insecticide, and piperonyl butoxide, technical, a mixed-function oxidase inhibitor.

If on skin or clothing
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a Poison Control Center or doctor for treatment advice.

NOTE TO PHYSICIAN
This product contains a pyrethroid. Skin contact may be followed by transient tingling or numbness, usually of the face, but this subsides without treatment.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For non-emergency information on product usage, call 1-888-600-YTEX (9839) Monday through Friday 7:30am to 4:30pm. For information regarding medical emergencies, call Chem-Tel Inc. at 1-800-255-3924.

PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if absorbed through skin. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Wear long-sleeved shirt and long pants, socks, shoes, and chemical-resistant gloves made of any waterproof material. Remove and wash contaminated clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Applicators and other handlers must wear:
- Long-sleeved shirt and long pants;
- Chemical-resistant gloves made of any waterproof material; and
- Shoes and socks.

USER SAFETY REQUIREMENTS
- Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.
- Discard clothing and other absorbent materials that have been heavily contaminated with the product's concentrate. Do not reuse them.

User Safety Recommendations
- User should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- User should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- User should remove PPE immediately after handling this product. As soon as possible, wash thoroughly and change into clean clothing.

Environmental Hazards
This pesticide is **extremely** toxic to aquatic organisms, including fish and invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.
