

# Description:

TRI-ZAP is a sustained-release, plastic ear tag containing a synergized formulation of Zetacypermethrin, a potent, enriched S-isomer pyrethroid compound and Abamectin, a highly active macrocyclic lactone that has never before been used in combination on cattle. TRI-ZAP is for use on Beef and Dairy Cattle (including Lactating) and Calves to control Horn Flies, Face Flies, Lice and Spinose Ear Ticks.

### Effectiveness:

TRI-ZAP controls Horn Flies, Face Flies, Lice, and Spinose Ear Ticks on Beef and Dairy Cattle (including lactating) and Calves.

### Product Advantages:

- TRI-ZAP is the only tag worldwide to contain a combination of pyrethroid and macrocyclic lactone compounds, both of which are synergized with Piperonyl Butoxide.
- Labeled for use on Beef and Dairy Cattle, including calves and lactating Dairy Cows.
- · No withdrawal period for meat or milk.
- Controls Horn Flies for up to four months with two tags per head.
- Controls Face Flies (mechanical vector of Moraxella bovis, the bacterium which causes "Pink Eye" in cattle) in calves with two tags per head.
- · Reduces blood loss in cattle due to Horn Fly feeding.
- One or two tags per head controls Face Flies for up to two months.
- Two tags per head controls Lice and Spinose Ear Ticks for up to three months.
- Has the Y-TEX Snap-Lok® collar for guaranteed retention against tag or button failure for five months.
- For management of insecticide resistance, TRI-ZAP is ideal for rotation with other insecticide ear tags according to Y-TEX's recommended rotation program.

20 Tags

Each tag includes a male button for attachment.

Ranch Packs - 100 Tags (5 pouches of 20 tags each) Each tag includes a

male button for attachment.

### **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This labeling must be in the possession of the user at the time of pesticide application.

Use to prevent feeding and irritation by Horn Flies, Face Flies (mechanical vector of *Moraxella bovis*, the bacterium which causes "Pink Eye" in Cattle), Lice and Spinose Ear Ticks in Beef and Dairy Cattle (including lactating) and Calves.

- For **optimum** control of all pests listed, use 2 tags per animal 1 tag per ear. (Tag all animals in the herd, including calves, and replace as necessary)
- For **adequate** control of Horn Flies and Face Flies, use 1 tag per animal. (Tag all mature animals in the herd and replace as necessary)

*TRI-ZAP* prevents feeding and irritation by Horn Flies for up to 4 months with 2 tags per animal and up to 2 months with 1 tag per animal. *TRI-ZAP* prevents feeding and irritation by Lice and Spinose Ear Ticks for up to 3 months with 2 tags per animal. *TRI-ZAP* prevents feeding and irritation by Face Flies for up to 2 months with 1 or 2 tags per animal. No withdrawal period for meat or milk. To minimize development of insecticide resistance, remove used tags at end of season and follow the Y-TEX recommended tag rotation program. Remove tags before slaughter.

Apply as shown with the Y-TEX UltraTagger plus.

STEP 1 Seat male button firmly on pin, press down and give a slight twist.

STEP 2
Place female tag firmly under clip.
Collar on tag must be pointing away from pin.

STEP 3
Position applicator over ear and squeeze the handles together.

The ideal position for male stud is between the second and third radial cartilage as shown.

### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

**PESTICIDE STORAGE**: Store in a cool, dark place in original container, away from direct sunlight. Opened bags containing ear tags should be resealed for storage.

**PESTICIDE DISPOSAL:** Remove tags before slaughter. Securely wrap used tags in a plastic bag or several layers of newspaper and discard in trash.

**CONTAINER HANDLING:** Non-refillable container. Do not reuse bag. Discard bag in trash, or offer for recycling if available.
